

# Before the Cloud, Before the Click, There Was This.

Before schedules were synced and records lived in the cloud, time was marked by touch, by sound — a crisp mechanical imprint, punched into card and memory alike.

The Cincinnati Time Recorder stood at the threshold of every shift, every workday, every era.

In this age of wireless convenience, we return to what was built to last: machines made of metal, made with care, made to be held — not just used.
